# RedPort

Can’t get WiFi?

**RedPort Halo**

**WiFi Extender can.**

# Halo Long-Range WiFi and Local Hub

## • Long-Range WiFi Extender

The RedPort WiFi Extender takes a weak WiFi signal - at a marina, truckstop, camp, etc - and boosts it in order to repeat it back directly to you, *up to 7 miles away*.

## • Local Hub

Share your remote connection with all the WiFi capable devices near you – on your boat, truck, or building – up to 50 meters away with multi-user support.

## • NMEA Compatible

Share available GPS data and other NMEA-compatible information across your WiFi network easily.

## • GSM & Satphone Compatible

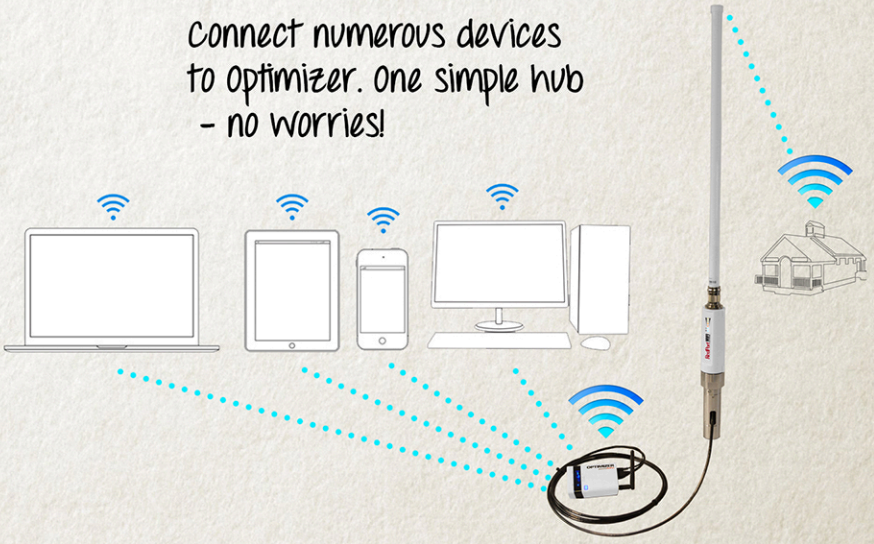
Seamlessly works with all current satellite phones/ terminals and select GSM-based USB modems.

## • Optimized Apps

The RedPort Halo system works with RedPort XGate and other leading data acceleration apps, including OCENS Mail; Network Innovations Speedmail; Satphone Store Satphone.me; SatLink Mail and more. Access email 20 times faster and browse the web 3-5 times faster on average than uncompressed usage. Works over any standard Internet connection.

## The RedPort Halo System

The RedPort Halo System includes:
- Long-Range WiFi Extender
- Stainless steel mount
- RedPort Optimizer WiFi Hotspot
- Optional compression/acceleration apps



## Specs

- Up to 7 mile range in perfect conditions
